

Your Investment. Your Future

Freisenbruch-Meyer Group offers a choice in pension plans

BY KURT-JAMES D. KAULBACH

Employers take note! Freisenbruch-Meyer Group (FMG) is now offering two distinct pension packages for the convenience of everyone working in Bermuda. For Bermudian clientele the insurance group affords a legislatively approved, wholly customisable pension plan. For non-U.S. expatriate customers,

FMG extends a pension plan providing an extensive array of modifications as an unregistered product of the island.

Employees who choose either package are offered individualised products, some allowing them the right to open or close accounts at their leisure. Alternatively, employees can lower their in-house administrative costs or consolidate all of their investment accounts into one easy to manage scheme.

In conjunction with their New York partners, FM International, FMG offers a wide range of services to help clients understand and decide upon a strategy. Their consultants help to design and customise a pension plan that best suits the financial goals of the client. To put it simply: they provide what you need. Through partnership with FM International, FMG is the only com-

pany in Bermuda to offer both locally and United States compliant pension plans. So for any U.S. taxpaying employees currently residing in Bermuda, they can provide companies with comprehensive 401(k) plans for those employees who fall under the requirements.

To ensure confidentiality FMG is able to conduct analysis, collaborate and provide customers with the plan of their choice from office points in both Bermuda and the United States. They understand customers appreciate the offshore protection of their records, but even with their business being carried out in another jurisdiction FMG still provides for them a local representative who is able to access the client's profile and answer any questions they might have.

Whether working together with local companies or multinational corporations, the dedication, professionalism and personal attention to a customer's unique goals at FMG remains their highest ambition. With access to a worldwide roster of fund managers and investment specialists, along with FM International, FMG provides limitless investment options to meet any retirement need.

FM International has a newly launched, interactive and easy to navigate website designed for even the least financially savvy customers. Visit FMG online at www.fmggroup.com and open the link www.pensions123.com to access the site. BB
